Inspire is launching an exciting new product for 2006 – Insight Financial Management for Professionals...

We have worked with a team of trusted advisers to create this quality specialist product. It is unique. Whatever your current practice statistics are, Insight can show you how to improve your cash flow and extend your financial management knowledge to achieve your business objectives and success.

Insight focuses on working together to look at your current statistics and will show you how to improve your business. It can cover five main issues: increasing profitability, improving cash flow, reducing taxation, mitigating risk and managing wealth.

Our programme will be interactive, encouraging participation for all and will be fun and informative. This will enable us to provide you with some practical advice and tips to help improve your business. At the end of the programme we will have drawn up an insight into your business potential.

Give your business some insight into the future!

The main areas covered in the Insight programme are:

Increase Profitability

As professionals we know that you always want to do better. It doesn't matter how successful your practice already is, we can work with you to formulate a plan to increase profitability. Through interactive sessions we can collectively assess your current business objectives and strategy, suggesting ways to increase revenue streams and raise finance.

Improve Cash Flow

Not only do we all want a more profitable business, but we know that a steady cash flow is vital to a successful business. We will focus on improving your cash flow and increasing liquidity in the ways that are most appropriate for you.

Reduce Taxation

We will work with you to advise the best way forward for your practice to take advantage of tax saving opportunities that will minimise your overall liabilities.

The main focus points of our positive tax saving and effective tax planning are:

- Efficient cash extraction
- Maximising relief for business owners
- Pension planning
- Inheritance tax planning
- Safeguarding assets

Mitigate Risk

Mitigating the risk of financial or business loss is essential to enable a business to stay ahead.

The risks we will consider are:

- Succession issues
- Internal reliance on key partners
- External reliance on key clients
- Over-reliance on certain business introducers
- Continuity of business

Wealth Management

Working together we can help realise, preserve and protect your wealth. This can include:

- Practice benchmarking
- Practice valuations
- Grooming for sale
- Disposal advice

The Plan

Not only will you gain exceptional business advice and interactive consultancy through our programme, but we will also provide you with a written plan that will be invaluable in terms of successful, long-term business planning.

What Next?

If you would like any further details on how the Insight programme can help you and your business, then please contact us on +44 (0)191 487 7074, or complete and return the enclosed faxback form.

We can provide a quotation for your practice free of charge and with no obligation.
